INTRODUCTION

ABOUT ME

I am an aspiring scientist in the field of computational neuroscience, interested in developing theories on the dynamics of learning and memory in the brain, with possible applications to machine learning. I have a strong mathematical background and hands-on experience with advanced methods from statistical physics and computer science applied to analyze problems and experimental results from neuroscience and machine learning.

PHD THESIS

Title: *Analysis of invariant object representations through linear classification of manifolds.*

Advisor: Prof. Haim Sompolinsky

In my PhD thesis, I used statistical physics methods to analyze neuronal responses to objects and measure the properties important for linear object classification. Those are geometric properties of object manifolds which I use to shed light on object representations in artificial deep networks and the brain and how it changes across levels of processing.

RESEARCH INTERESTS

- Population coding and manifold representation of sensory information.
- Biological learning and its relation to memory encoding and usage.
- Neural implementation of world models and its application to reinforcement learning.
- Biological alternatives to error backpropagation, implementation of gradient descent.
- Predictive coding and its relation to learning and memory.

EDUCATION AND RESEARCH

2023 – 2024 Postdoctoral fellow at the University of Cambridge

Working with Professor Máté Lengyel at the Computational and Biological Learning lab.

2022 Postdoctoral fellow at the Hebrew University of Jerusalem

Working with Professor Haim Sompolinsky at the Edmond & Lily Safra Center for Brain Sciences.

2011 – 2021 PhD at the Hebrew University of Jerusalem

PhD program in *Brain Sciences: Computation and Information Processing*, at the Edmond & Lily Safra Center for Brain Sciences.

2002 – 2005 BSc at the Hebrew University of Jerusalem

Graduated Summa Cum Laude a double-major degree in Mathematics and Cognitive sciences.

INDUSTRY EXPERIENCE

2007 – 2010 Senior Team Lead and Senior Software Developer at Microsoft R&D

Leading a team of 4 software developers and handling all professional aspects: mentoring and guiding professional growth, project management, and technical leadership.

2005 – 2007 Senior Software Developer at Kidaro (an Israeli start-up)

The leading technical person from project inception and building the company's work processes, through design and implementation of a complete product, to being acquired by Microsoft.

AWARDS

- 2022 Recipient of the Blavatnik Cambridge Postdoctoral Fellowship.
- 2011 Recipient of the Hebrew University Rector's award (the highest academic award).
- 2005 Graduated *Summa Cum Laude* (average grade 97.2) a BSc at the Hebrew University.
- 2004-5 *Amirim Nature* excellence program for Hebrew University students.
- 2004 Recipient of the Hebrew University Rector's award.
- 2003 Recipient of the Hebrew University Rector's award.
- 1995 *Gur Arye prize* for high-school graduation projects for my work on *Statistical analysis and game theory of the mastermind game*.

ACTIVITIES

- Teaching experience: served 7 years as teaching-assistant
 - *Statistical Physics of learning and Memory* (introductory seminar for physics students): mentoring students in preparing their talks and giving several lectures.
 - *Statistical mechanics of spin glasses and neural networks*: giving several lectures.
 - *Topics in the Theory of Deep Learning*: a weekly lecture and preparing exercises.
- Co-organizer of the *Deep Learning Journal Club*, at the Jerusalem deep-learning center.
- Reviewer for
 - *Journal of Machine Learning Research (JMLR)*
 - *IEEE Transactions on Neural Networks and Learning Systems*
 - *International Conference on Learning Representations (ICLR)*
 - *Conference on Neural Information Processing Systems (NeurIPS)*
- Program committee member for
 - *NeurIPS 2022 workshop on Symmetry and Geometry in Neural Representations*
- Industry-level software developer skills and experience in using deep learning tools.

SKILLS

- Have a wide-field perspective on computational neuroscience, machine learning.
- Fluent with advanced mean-field methods from statistical physics (replica and cavity methods, message passing, kernel methods, KKT)
- Superb software engineering skills (fluent coding at C/C++/Python/MATLAB)
- Passion for teaching, extensive experience.
- Experience in numerical methods, deep learning tools, and large-scale simulations.
- Experience in neural data analysis; e.g., [Freiwald & Tsao 2010](#), [Majaj, Hong, et al. 2015](#), [Stringer, Pachitariu, et al. 2019](#).
- A team player and good at collaboration.
- Thorough, down-to-details approach.
- Welcomes feedback and criticism.
